2004 Street Rehabilitation – Red Bank Expressway

WHAT/WHEN: Street rehabilitation is currently underway for Red Bank Expressway from Erie Avenue Overpass to Duck Creek. Due to construction of a major storm sewer located 200 feet north of Red Bank Drive, motorists should reduce speed to 35 MPH when approaching the work area. Traffic will be maintained with closure of the northbound and southbound middle lanes, leaving one 11-foot curb lane in each direction open and available for traffic. This portion of the project should be completed by July 31, 2004.

The contractor is Barrett Paving and Materials, Inc.

The work may cause some traffic delays during peak hours. The public may wish to seek alternate routes to their destinations.

Motorists should reduce their speed and drive carefully when approaching the work area.
